

Application for Master's Degree Programme in Information Technology

It is with much pleasure that I submit my application for Master's Degree Programme in Information Technology. I completed my Bachelors of Science in Mathematics majoring in Computer Science at Ege University in Izmir/Turkey, and want to expand upon the experience and curriculum already gained through algorithm analysis, data structures and logic design by being a part of the program.

I believe the information and education that Master's Degree Programme in Information Technology will offer me will further develop all of the skills, qualifications, and understanding in the area of information technology. More than that, it offers me the opportunity to expand my education and able to see and live in Finland which i would very much like to do. I hope that the skills and knowledge I obtain from this graduate degree will give me the opportunity to seek a very good job in field of information technology and at the same time giving me tools and perception for research in this field.

Thank you so very much for your time and consideration. Please contact me if there is anything else I need to provide. I look forward to speaking with you further in the future.

Sincerely,

Tolga GOLBASI
